

**ATTACHMENT G - 1**  
**Capital Infrastructure Fund**  
**Department/Agency Request**

Date 9/14/05

Council member Rick Blackwell

Amount \$25,000

For (include public purpose) For the addition of a turning lane at Meyers Lane and Dixie Highway. This is necessary due to increased traffic and development on Meyers Lane.

Location: Meyers Lane at Dixie Highway in District 12

Metro Government Department/Agency or other Metro Government or Special Purpose District: Public Works Department

Contact Person: Rick Storm

Agency Phone: 574-3376

Agency Address:  
\_\_\_\_\_

I have reviewed this request for an expenditure of Metro Government tax dollars, and have determined that the funds will be used for a public purpose.

Of course, the only way to do business.

Will do. Will you show us the final cost and return any remaining dollars?

With gas prices jumping around it is hard to tie down. We have seen a 20 % cost increase on asphalt in the last year, petroleum is the main cost in asphalt between manufacturing and delivery, sorry probably more than you wanted to know. Lets call it \$ 25,000 for budget purposes.

Rick,

Councilman Blackwell would like to proceed with this. Can you get us a more exact estimate so we can appropriate the money to public works? Also, please let us know if there is anything we need to do to get this project started.

Thanks!

The cost to do something at this location would be in \$ 20-25,000 range. We are going to try to do this without relocating any utilities. If we do get utilities we can make them relocate at the utilities expense since they are in the Right of way but it would take longer to get the work completed. There are no funds available in Public Works budget for this work. Sorry we took so long to get this info to you.

Rick,

Any information on this? Please advise.

Jenny Parris

Rick,

You and I had talked about the possibility of adding a turning lane on Meyers Lane and Councilman Blackwell was going to pay for a study/survey with actual plans to move some of the electric lines and a drawing of the area with the additional turning lanes. Has any progress been made on this? Did we get an estimate for the study so we know how much to plan?

Please let me know.

Thanks!
